

# Revolutionise Your Learning Design Workshops with an App Wheel

Mark Glynn & Clare Gormley (DCU)

Jess Gramp, Nataša Perovic, & Clive Young (UCL)

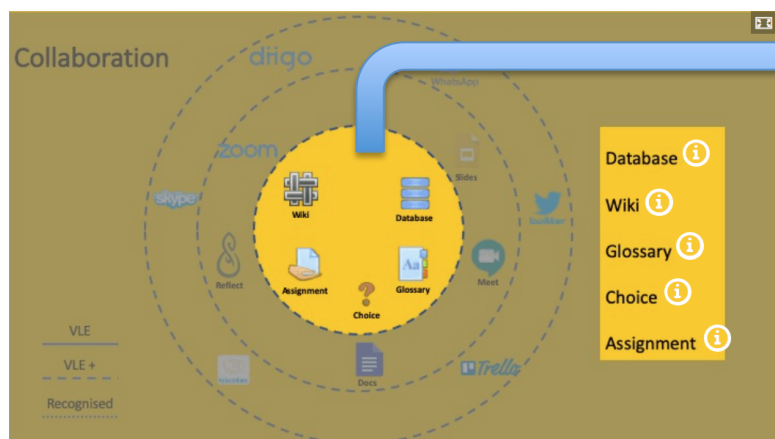

## What ABC Learning Design is

ABC Learning Design (ABC LD) is a high-energy, high-impact curriculum development workshop. In under two hours, staff work intensively in teams to create a storyboard of activities for a new or revamped module or programme. Activities are categorised into **six learning types** representing six potential pedagogies as shown here:

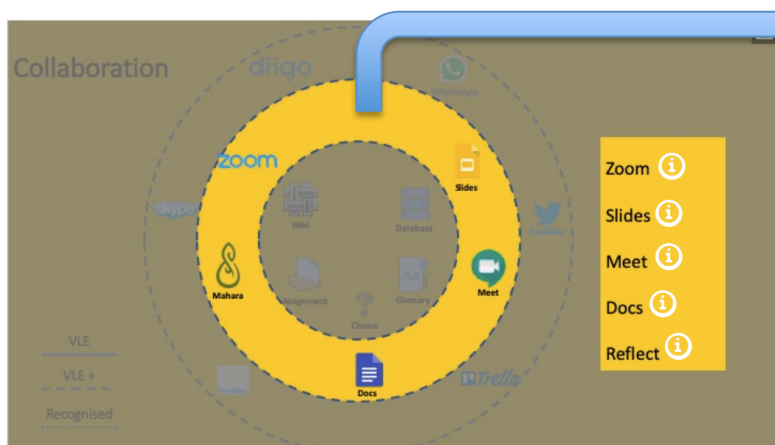

## What the ABC to VLE App Wheel is

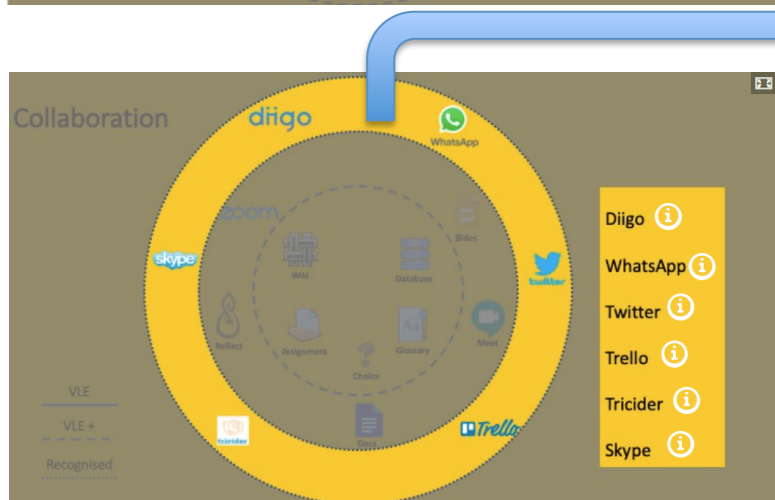

The App Wheel from Dublin City University (DCU) has been developed to help bridge the gap between the face-to-face ABC workshop and the real world. This online interactive wheel provides practical guidance on technologies and tools that can potentially enable academic teams to put the various learning types into practice:

Tools available within the core Virtual Learning Environment, in this case Moodle (**VLE**)

Tools supported by the institution that extend the VLE functionality (**VLE+**)

Tools used at the institution, but not directly supported (**Recognised**)

By clicking the relevant icon, workshop participants can access ‘How To’ videos and additional information about any tool or technology they wish to explore further. Developed in H5P, this tool is customisable so that organisations can potentially create their own version of a similar wheel. Microsoft PowerPoint and Moodle Book versions of the wheel are also available.
